

Directors Report

January 19, 2022, Airport Board Meeting

- Passenger Statistics – The airport finished strong considering our year with covid, delayed, and canceled flights. In December, 4,598 passengers were coming through the airport. The total number of passengers for the year was 48,481. We were down 23% from pre covid 2019 but up 63% from 2020.
- Airport staffing update – The two open Operation Tech position interviews were conducted on January 12 and 13. Nine candidates were interviewed, and I will update the board on the progress of the hiring process.
- FAA Inspection Update – I will go over the deficiencies and explain our plan to address these issues.
- Aircraft fuel income from July 2021 to January 1, 2022 – In July 2021, the airport started charging ten cents per gallon of fuel delivered into airport tanks. The airport was paid \$35,409.80 for the fuel produced in that time frame. I feel this is a better way of handling the fuel being sold by Flightline. This agreement works well for both the airport and Flightline especially tracking the fuel going through airport tanks.
- Next airport board meeting – The next airport board meeting will be at the Fulkerson Operations Facility on February 16, 2022.
